Dear Sir,

As to Item 9

We are also accepting flammable liquids in a limited amount. This material comes from the paper mills in the valley, such as inks, oils, greaseand glue. this material is placed very carefully in our landfill so as not to create any leaching. Other paper waste is used to soak up this material and then landfilled as to your specifications.

Item 10

The rodents are very few in number and poisen is set out to compensate this.

Item 11

we have a procedure we follow every day. This is according to D.N.R. specifications.

Very truly yours,

LEHRER SANITARY SERVICE

James Lehrer
